Platypus Studios to Provide Exhibit Fabrication for the Hall of Geological Wonders

Today the Board of Supervisors approved a contract with Platypus Studios to provide exhibit fabrication for the County Museum's Hall of Geological Wonders. The new facility will include a state-of-the-art exhibition depicting the paleontology and geology of San Bernardino County and the region, and will showcase the fossils from our region as well as the geological processes.

"Platypus Studios provided the exhibit design for the Hall of Geological Wonders in 2004 and is known for their expertise in exhibit fabrication. Their knowledge and experience will be of great benefit to the County in completing the exhibits," said Third District Supervisor Dennis Hansberger.

The exhibits at the Hall of Geological will consist of numerous 3-D objects, such as full-scale reconstructed fossil Mastodons, Tertatron, Dire Wolf, and other fossils, as well as actual paleo-habitats.

The Museum's Hall of Geological Wonders is expected to be complete in Winter 2008.
